(57) Abstract :

In today's world, personal safety is a serious concern, especially for women who encounter various risks in their daily routines. This innovation aims to develop a straightforward, easy-to-use safety alarm that enhances security and provides quick assistance in emergencies. The device will be compact and practical, designed to be worn or carried easily, so it's always accessible. By combining simplicity with reliability, the alarm offers peace of mind, ensuring that help is just a button press away when it's needed most. This innovation is focused on giving women a tool they can trust to keep them safer in their day-to-day lives.
